Keywords: educational learning resource, exam database, MediaWiki, online learning, wiki

Acknowledgements: We thank Wes Maciejewski for motivating us to share our story and to Will Engle, Cindy Underhill, Scott McMillan, Ido Roll, Warren Code, and the staff at the Centre for Teaching, Learning,

and Technology for taking the time to meet with us, approving our extension requests, making the usage data available, supporting us to seek support and apply for grants, and for the constant general encouragement to push this project forward.

We would like to acknowledge Patrick Jones for his permission to include his videos on our site. We would also like to thank all the wiki contributors throughout the years for their hard work in writing and reviewing templates and mathematical content, in particular, our founder David Kohler (who is also the inspiration for our mascots name, David Webster). We are also grateful for the UBC Math graduate committee for subsidizing pizza and sushi at some of our work sessions.

Biographical Sketches:

Carmen Bruni is a PhD candidate in Mathematics at the University of British Columbia. He has been involved with the MER wiki since its inception in February 2012.

Christina Koch received her Masters of Science in Mathematics at the University of British Columbia in 2013. She has been involved with the MER wiki since its inception in February 2012.

Bernhard Konrad is a PhD candidate in Mathematics at the University of British Columbia. He has been involved with the MER wiki since its inception in February 2012.

Michael Lindstrom is a PhD candidate in Mathematics at the University of British Columbia. He has been involved with the MER wiki since its inception in February 2012.

Iain Moyles is a PhD candidate in Mathematics at the University of British Columbia. He has been involved with the MER wiki since its

inception in February 2012.

Will Thompson is a PhD candidate in Mathematics at the University of British Columbia. He has been involved with the MER wiki since its inception in February 2012.
